DARSHIL PATEL

Virginia, USA — darshil.patel2001@gmail.com — LinkedIn — +1-571-276-3616

EDUCATION

The George Washington University, School of Engineering & Applied Science Washington, DC
Master of Science in Cybersecurity May 2026
GPA: 3.6/4.0
Relevant Coursework: Computer Network Defense, Network Security, Risk Management, Information Policy, Usable Security & Privacy

New LJ Institute of Engineering and Technology Ahmedabad, India
Bachelor of Technology in Information Technology June 2024
GPA: 3.4/4.0
Relevant Coursework: Computer Networks, Cryptography & Network Security, Wireless Communications

TECHNICAL SKILLS

- **Security Monitoring & Analysis:** Log Analysis, Network Traffic Analysis, Vulnerability Assessment, Incident Response Concepts, Wireshark, Nmap
- **Governance, Risk & Compliance:** NIST SP 800-53, NIST CSF 2.0, RMF, FISMA, Risk Assessment, Security Audits, Policy & SOP Development, Access Control/IAM
- **Offensive & Defensive Tools:** Metasploit, Burp Suite, Active Directory, Identity & Access Management
- **Data & Reporting:** Python (Pandas, NumPy), SQL (MySQL), Power BI, Microsoft Excel, Microsoft 365, Technical Documentation
- **Platforms:** Windows, Linux (Ubuntu), Git, Docker
- **Core Competencies:** Analytical Thinking, Attention to Detail, Written & Verbal Communication, Time Management, Ability to Work Independently

PROFESSIONAL EXPERIENCE

Community Dreams Foundation Remote, USA
Cybersecurity Analyst (Volunteer) July 2026 – Present
- Identify and resolve security vulnerabilities to safeguard organizational information system assets and infrastructure.
- Define access privileges and control structures aligned with NIST SP 800-53 security controls.
- Conduct periodic security audits to detect inefficiencies, recognize anomalies, and report policy violations.
- Prepare performance reports and communicate system status to stakeholders across cross-functional teams.

Gujarat Technological University - IDEA Lab Ahmedabad, India
AIML Intern Jan 2024 – Apr 2024
- Monitored performance logs and system data to identify anomalies, ensuring reliability and integrity across production systems.
- Maintained structured database records with strict data integrity controls, generating analytical reports to support operational decision-making.

WeTheDevelopers Rajkot, India
Software Application Development Intern July 2023 – Aug 2023
- Identified and resolved system inconsistencies through code reviews and log-based performance analysis prior to deployment.
- Analyzed datasets to identify anomalies and performance trends, documenting findings for cross-functional stakeholders.

ACADEMIC WORK & PROJECTS

Access Control & Cybersecurity Policy Simulation March 2025
- Designed a simulated access management environment enforcing least privilege and need-to-know principles, processing 50+ user access requests aligned with NIST SP 800-53 controls.
- Drafted cybersecurity policy documentation, conducted gap assessments, and developed SOPs for audit-ready security operations.

Network Defense & Incident Response Simulation Coursework Project
- Analyzed network traffic captures using Wireshark and Nmap to identify indicators of compromise and unauthorized access attempts.
- Applied incident response and computer network defense principles to document findings and recommend containment and remediation steps.

LICENSURE

- **Security+ (Sec+)** – CompTIA (Certificate) March 2026
- **Certified in Cybersecurity (CC)** – ISC2 (Certificate) March 2025
- **Foundations of Cybersecurity** – Coursera, Google July 2024
